

The Honourable Doug Ford - doug.ford@pc.ola.org
The Honourable John Yakabuski - john.yakabuskico@pc.ola.org

Dear Sirs,

I am delighted to hear the recent news that the Ford government recognizes the urgent need to address the water management plan in the Muskoka region. With four floods in the last six years, urgent action is needed to deal with our **Climate Crisis** and to put measures in place to prevent future severe flooding events. I look forward to actively following your government's leadership in dealing with an outdated water management plan and the havoc it continues to create.

Our cottage property is just one of thousands in the Muskoka area that has suffered significant flood damage this year. **[Briefly describe the damage as shown in the attached picture (s)]**

I look forward to hearing more news on possible initiatives for flood damage mitigation in the near future.

Regards,
